PROFILE

Dynamic and highly skilled Full Stack Developer with three years of experience in startup environments. Proficient in JavaScript, TypeScript, Python, GraphQL, MongoDB, PostgreSQL, and AWS (EC2, S3, SQS). Experienced in utilizing a combination of Scrum and Kanban methodologies, continuous integration and delivery, and agile software development principles. Proven track record of delivering high-quality solutions while working on an e-commerce platform for circuit board manufacturers.

EMPLOYMENT HISTORY

Full Stack Developer at Boardera, Kitchener, Ontario

June 2020 — Present

- Developed features to streamline supplier on-boarding, including loading projects on behalf of customers, resulting in a 30% reduction in on-boarding time.
- Implemented interactive detailed pricing breakdown, allowing manufacturers to adjust pricing, resulting in a 20% increase in customer satisfaction and custom pricing flexibility.
- Revamped the user interface, adhering to new Figma designs, resulting in a modern and visually appealing user experience.
- Refactored legacy code to improve reliability, scalability and maintainability

EDUCATION

Philosophy & Business Administration at Trent University, Peterborough, Ontario

September 2014 — April 2018
